DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 5, 2003 has been entered.

Drawings

2. New corrected drawings are required in this application because they are informal and improper for printing. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 6-11 and 33-35 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to

specifically disclose a spectral resolving system having a beam shearing system with a beam splitter particularly on the surface of the prism and an air gap adjacent this surface and where the angle at which the beam splitter is aligned is less than the critical angle above which total internal reflection of a portion of the beam of lights occurs.

4. Claims 12-22 and 31 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose a static interferometer comprising fore-optics with a chief ray and a pupil that is asymmetric relative to the chief ray that collects and focuses light into a beam for entry into the spectral resolving system and a detector located at the exit pupil to receive and process image data. Furthermore, the prior art of record fails to disclose fore-optics with an asymmetric pupil are telecentric in image space.

5. Claims 23-30, 32, and 36-39 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose a reflective subsystem with a plurality of reflective surfaces arranged such that one of the beams undergoes one reflection and the other of the separate beams undergoing three reflections. Furthermore, the references do not specifically disclose data processing using Fast Fourier Transforms on the digitized measurements to obtain spectral composition of the incident radiation and digital filters

to detect the presence or absence of characteristically incident radiation by particular substances.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Y. Wang whose telephone number is 703-305-7242. The examiner can normally be reached on M-F, 8 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 703-305-3492. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
